Subject index*

A

Acetazolamide, effect of, on sodium reabsorption in the diluting segment in man, 630
Acid-starch gels, simplified a_1-antitrypsin phenotyping by immunofixation of, 710
Aggregation, platelet, labile aggregation stimulating substance, free fatty acids, and, 73
Aging, effect of, on renin activity and aldosterone excretion, 947
Aldosterone excretion and renin activity, effect of aging on, 947
  and renin-angiotensin responses to stimuli in patients with treated congestive heart failure, 1005
Antigen(s), D-group, purification and characterization of, autoantigens in human sweat, 251
  fibrinogen, and several other plasma proteins in hemostatic plugs in humans, factor VIII-related, immunofluorescent localization of, 112
  hepatitis-B surface, radioimmunoassay to determine the subtypes D and Y of, 734
Antilymphocyte sera, procoagulant and platelet aggregating properties of, 868
Antiplasmin, platelet: its extrusion during the release reaction, subcellular localization, characterization, and relationship to antiheparin in pig platelets, 659
a_1-Antitrypsin, genetic typing of, by immunofixation electrophoresis, identification of subtypes Pi M, 152
  simplified, phenotyping by immunofixation of acid-starch gels, 719
Arginine vasopressin, heterologous radioimmunoassay for, 338
Asthma, allergic, effect of cholinergic and anti-cholinergic agents on the primate model of, 65
Autoantigens in human sweat: purification and characterization of the D-group antigens, 251

B

Bacteria, sources of variance in measurement of intrapulmonary killing of, 544
Bacterial interference as factor in renal infection, 792
Bernard-Soulier syndrome: a new platelet glycoprotein abnormality. Its relationship with platelet adhesion to subendothelium and with the factor VIII von Willebrand protein, 586
Bicarbonate level in plasma, effect of, on proximal tubule sodium reabsorption in NH_4Cl-loaded dogs, 804
Bile acid synthesis and hepatic cholesterol in patients with gallstones, effect of chenodeoxycholic acid and phenobarbital on the rate-limiting enzymes of, 281
Bilirubin, effects of acute infectious hepatitis and cirrhosis of the liver on the nonerythropoietic component of early, 240
  in man, new approach to quantitation of various sources, 767
Blood pressure, body fluids, electrolytes, renal function, and serum lipids of normotensive man, effect of dietary sodium chloride on, 418
  diastolic and systolic, measurements in monkeys determined by noninvasive tail-cuff, 354
Body fluids, blood pressure, electrolytes, renal function, and serum lipids of normotensive man, effect of dietary sodium chloride on, 419

C

Carnitine, urinary excretion of, in man, 760
Catheterization, diagnostic, determinants of variation between Fick and indicator dilution estimates of cardiac output during, 568
Cells, separation of, hematocrit, hypertonicity, deoxygenation, and mixture with normal cells, influence of, rheological studies of Hb SS blood, 475
Cesium, nonradioactive, and fluorescent excitation analysis, measurement of circulating red cell volume using, 535
Charcoal treatment, correction of protein binding defect in uremic sera by, 637
Chenodeoxycholic acid and phenobarbital, effect of on rate-limiting enzymes of hepatic cholesterol and bile acid synthesis in patients with gallstones, 281
Chloramine-T, satisfactory radioiodination of rabbit fibrinogen using, 169
Cholelithiasis, cholesterol, induced by diet in prairie dog, 987
Cholestanol, direct quantitation of, in plasma by gas-liquid chromatography, 345
Cholesterol cholelithiasis induced by diet in prairie dog, 987
  hepatic, and bile acid synthesis in patients with gallstones, effect of chenodeoxycholic acid and phenobarbital on the rate-limiting enzymes of, 281
  and triglyceride, in myotonic dystrophy, direct relationship of proinsulin-insulin hypersecretion to basal serum levels of, 384
  xanthoma, turnover of, in hyperlipoproteinemia patients, 503
Cholinergic and anti-cholinergic agents on the primate model of allergic asthma, effect of, 65
Chondrocytes, effect of environmental pH on glycosaminoglycan metabolism by normal human, 198
Chromatography, gas liquid, direct quantitation of cholestanol in plasma by, 345
  affinity, direct measurement of the platelet:collagen interaction by, on collagen/Sepharose, 525
Cirrhosis, decompensated, determinants of deranged sodium and water homeostasis, 822
  of liver on nonerythropoietic component of early bilirubin, effects of acute infectious hepatitis and, 240

*January, pp. 1-178; February, pp. 179-370; March, pp. 371-558; April, pp. 559-738; May, pp. 739-908; June, 909-1102.

Clot retraction, evaluation in dilute suspensions of platelet-rich plasma and gel-separated platelets, 48
Cobalamin deficiency, human, defective leukocyte metabolism in, impaired proprionate oxidation and serine biosynthesis reversible by cyanocobalamin therapy, 89
Coils, detrimental effects of ultrafiltration on diffusion in, 435
Consumerism and clinical investigator, 179
Contraceptives, oral, women using, vitamin B_6 status of, 813
Counterimmunoelectrophoresis, detection of pneumococcal polysaccharide in sputum of patients with pneumococcal pneumonia by, 496
C-reactive protein, molecular size of, synthesized in vitro, 617
radioimmunoassay of human, and levels in normal sera, 120
Cyanate, extracorporeal treatment with, in sickle cell disease: preliminary observations in four patients, 462
Cyanobobalamin therapy, impaired proprionate oxidation and serine biosynthesis reversible by, defective leukocyte metabolism in human cobalamin deficiency, 89
Cystic fibrosis, quantitative evaluation of serum pancreatic isoamylases in, 164

D

Deoxygenation, hematocrit, hypertonicity, separation of cells, and mixture with normal cells, influence of, rheological studies of Hb SS blood, 475
Depletion, renin, on renal function after release of 24-hour ureteral obstruction, influence of, 58
Dextran in presence of glucose, semiautomated micromethod for, 898
D-group antigens, purification and characterization of, autoantigens in human sweat, 251
Diastolic and systolic blood pressure measurements in monkeys determined by noninvasive tail-cuff, 354
Diazoxide, PGA_1, PGE_2, effect of, on myocardial contractile force, 260
Di-2-ethylhexyl phthalate, delivery of, to patients during hemodialysis, 519
Drug therapy, single and multiple, in autologous immune complex nephritis in rats, 27
Duodenal and gastric secretions, artifacts in radioimmunoassay of peptide hormones in, 292
Dystrophy, myotonic, direct relationship of proinsulin-insulin hypersecretion to basal serum levels of cholesterol and triglyceride in, 384

E

Electrolytes, blood pressure, body fluids, renal function, and serum lipids of normotensive man, effect of dietary sodium chloride on, 418
Electrophoresis, immunofixation, genetic typing of a_1-antitrypsin by, identification of subtypes Pi M, 152
Electrophoretic heterogeneity of normal factor VIII/Von Willebrand protein, and abnormal electrophoretic mobility in patients with Von Willebrand's disease, 185
Endocrine system, vitamin D, recent advances in our understanding, of, 7
Enzymes, rate-limiting, of hepatic cholesterol and bile acid synthesis in patients with gallstones, effect of chenodeoxycholic acid and phenobarbital on, 281
Enzymic method for spectrophotometric determination of oxalic acid, 903
Eosinophil kinetics in hypereosinophilic syndrome, 487
Erythrocytes and plasma diluted, direct spectrofluorometry of: a rapid diagnostic method in primary and secondary porphyrinemias, 362
Erythropoietic factor, renal, activation of, by phosphorylation, 83
Extracorporeal treatment with cyanate in sickle cell disease: preliminary observations in four patients, 462

F

Factor VIII-related antigen, fibrinogen, and several other plasma proteins in hemostatic plugs in humans, immunofluorescent localization of, 112
Factor VIII/Von Willebrand protein and abnormal electrophoretic mobility in patients with Von Willebrand's disease, electrophoretic heterogeneity of normal, 185
Fatty acids, free, labile aggregation stimulating substance, and platelet aggregation, 73
Fibrinogen, antigen, and several other plasma proteins in hemostatic plugs in humans, factor VIII-related, immunofluorescent localization of, 112
and its degradative fragments D and E, roles of renal catabolism and uremia in modifying clearance of, 934
rabbit, satisfactory radioiodination of, using chloramine-T, 169
Fibrosis, cystic, quantitative evaluation of serum pancreatic isoamylases in, 164
Fitzgerald trait, kininogen deficiency in: role of high molecular weight kininogen in clotting and fibrinolysis, 327
Fluid reabsorption, site of decreased, after release of ureteral obstruction in rat, 397
Fluorescent excitation analysis, measurement of circulating red cell volume using nonradioactive cesium and, 535
Folate, red cell, and serum, radioassay for, 138
serum, clinical value of radioassay of, 859
Furosemide, inhibitory effect of, on glucose transport, 960

G

Gallstones, effect of chenodeoxycholic acid and phenobarbital on the rate-limiting enzymes of hepatic cholesterol and bile acid synthesis in patients with, 281
Gastric and duodenal secretions, artifacts in radioimmunoassay of peptide hormones in, 292
Gels, acid-starch, simplified a_1-antitrypsin phenotyping by immunofixation of, 710
Genetic typing of a_1-antitrypsin by immunofixation electrophoresis, identification of subtypes Pi M, 152
Glucose, blood, concentrations, and serum potassium, changes in, after trimethaphan administration in man, 999

Glucose—cont'd.
dextran in presence of, semiautomated micromethod for, 898
intravenous, portal and peripheral vein insulin responses to, in rhesus monkey, 919
transport, inhibitory effect of furosemide on, 960
Glutathione reductase and transketolase, determination of, effect of simultaneous thiamin and riboflavin deficiencies, 741
Glycoprotein, granuloma, biological properties of, that inhibits macrophage phagocytosis, 98
Glycosaminoglycans metabolism, effect of environmental pH on, by normal human chondrocytes, 198
Granulocyte transfusion therapy and pre-immunization, combined, for treatment of pseudomonas septicemia in neutropenic dogs, 840
Granuloma glycoprotein, biological properties of, that inhibits macrophage phagocytosis, 98

H

Hb SS blood, rheological studies of, influence of hematocrit, hypertonicity, separation of cells, deoxygenation, and mixture with normal cells, 475
Heart, artificial, three-month survival of calf with, 848
failure, congestive, treated, aldosterone and renin-angiotensin responses to stimuli in patients with, 1005
Hematocrit, hypertonicity, separation of cells, deoxygenation, and mixture with normal cells, influence of, rheological studies of Hb SS blood, 475
Hemodialysis, chronic uremia, and renal transplantation on plasma lipids and lipoproteins in man, effects of, 37
delivery of di-2-ethylhexyl phthalate to patients during, 519
Hemostatic plugs in humans, immunofluorescent localization of factor-VIII-related antigen, fibrinogen, and several other plasma proteins in, 112
Heparin therapy, capillary test for control of, 893
Hepatic cholesterol and bile acid synthesis in patients with gallstones, effect of chenodeoxycholic acid and phenobarbital on the rate-limiting enzymes of, 281
Hepatitis, acute infectious, and cirrhosis of liver on nonerythropoietic component of early bilirubin, effects of, 240
Hepatitis-B surface antigen, radioimmunoassay to determine the subtypes D and Y of, 734
Histamine, IgE-mediated, and SRS-A release from respiratory cells and peripheral blood leukocytes of rhesus monkeys, 1016
metabolism: thin-layer radiochromatographic assays for histaminase and histidine decarboxylase enzyme activities, 1065
Histaminase and histidine decarboxylase enzyme activities, thin-layer radiochromatographic assays for, 1065
Histidine decarboxylase enzyme activities, thin-layer radiochromatographic assays for, 1065
Hormonal therapy and alteration of lymphocyte proliferation, 227
Hydronephrosis, salt-induced hypertension in rats with hereditary; effect of renomedullary transplanation, 232
Hyperlipoproteinemia patients, turnover of xanthoma cholesterol in, 503
Hyperparathyroidism, relationship of serum ionized and total calcium in primary, 624
Hypersecretion, direct relationship of proinsulin-insulin, to basal serum levels of cholesterol and triglyceride in myotonic dystrophy, 384
Hypertension: model for education in chronic illness, 739
renal, severe, experimental model of, 561
salt-induced, in rats with hereditary hydronephrosis: effect of renomedullary transplantation, 232
Hypertensive rat, exaggerated natriuresis in conscious spontaneously, 265
Hypertonicity, hematocrit, separation of cells, deoxygenation, and mixture with normal cells, influence of, rheological studies of Hb SS blood, 475

I

Immunodiffusion, radial, immunoassay of human platelet factor 4 (PF_4, antiheparin factor) by, 720
Immunofixation of acid-starch gels, simplified a_1-antitrypsin phenotyping by, 710
electrophoresis, genetic typing of a_1-antitrypsin by, identification of subtypes Pi M, 152
Immunofluorescent localization of factor VIII-related antigen, fibrinogen, and several other plasma proteins in hemostatic plugs in humans, 112
Insulin, effect of, on mitochondrial oxidative phosphorylation and energy charge of perfused guinea pig liver, 925
method for immunoassay of, in presence of insulin therapy-induced antibody, 1050
responses, portal and peripheral vein, to intravenous glucose in rhesus monkey, 919
Interstitial fluid to plasma volume, changes in ratio of, during long-term antihypertensive therapy, 781
Iron-binding protein, new, isolated from intestinal mucosa, 670
Isoamylases, serum pancreatic, in cystic fibrosis, quantitative evaluation of, 164

K

Kininogen deficiency in Fitzgerald trait: role of high molecular weight kininogen in clotting and fibrinolysis, 327

L

Lead content of tissues of baby rats born of, and nourished by lead-poisoned mothers, 273
Leprosy, lepromatous, defective leukotaxis in patients with, 1025
Leukocyte(s) colony-stimulating factor and inhibitor activity, 1041
metabolism, defective, in human cobalamin deficiency, impaired proprionate oxidation and serine biosynthesis reversible by cyanocobalamin therapy, 89
serum bactericidal activity and phagocytosis by normal blood, host resistance to *Serratia marcescens* infection, 206

Leukotaxis, defective, in patients with lepromatous leprosy, 1025
Lex-O_2-Con, drift in the oxygen content measured with: long-term assessment, 717
Lipid synthesis by dihydroxyacetone phosphate pathway in rabbit lung subcellular fractions, evidence for, 1033
Lipoproteins in man, effects of chronic uremia, hemodialysis, and renal transplantation on plasma lipids and, 37
Liver function, altered, comparison of sulfobromophthalein (BSP) and sulfobromophthalein glutathione (BSP-GSH) disposition under conditions of, and in isolated perfused rat liver, 373
  perfused guinea pig, effect of insulin on mitochondrial oxidative phosphorylation and energy charge of, 925
Lymphocyte proliferation, hormonal therapy and alteration of, 227

M

Macromolecules, peptide-binding, in blood of seriously ill or mentally retarded patients, 299
Macrophage phagocytosis, biological properties of granuloma glycoprotein that inhibits, 98
Mannitol, effect of, on phosphate transport in intact and acutely thyroparathyroidectomized rats, 680
Medical meeting, general, facing extinction? 559
Middleton, William S., 1890-1975, 371
Mineral loss with aging, measurement of rates of, 882
Monkeys, diastolic and systolic blood pressure measurements in, determined by a noninvasive tail-cuff, 354
Mucosa, intestinal, new iron-binding protein isolated from, 670
Myocardial contractile force, effect of PGA_1, PGE_2, diazoxide on, 260

N

Natriuresis, exaggerated, in conscious spontaneously hypertensive rat, 265
Nephritis, autologous immune complex, in rats, single and multiple drug therapy in, 27
  nephrotoxic, influence of selective thrombocytopenia on, 967
Neutrophil marrow reserves and intravascular survival, new test for, 1075
5-Nitro-2-furaldehyde diacetate, inhibition of platelet aggregation by, with observations on structure-activity relationships, 703

O

Oxalic acid, enzymic method for spectrophotometric determination of, 903
Oxygen content, drift in, measured with the Lex-O_2-Con: long-term assessment, 717

P

Pancreatic isoamylases, serum, in cystic fibrosis, quantitative evaluation of, 164
Parathyroid hormone secretion and renal phosphate handling in normal man, failure of water immersion to influence, 218
Pencillin flux between blood and cerebrospinal fluid, effect of uremia on, 749
Peptide-binding macromolecules in the blood of seriously ill or mentally retarded patients, 299
Peptide hormones in gastric and duodenal secretions, artifacts in radioimmunoassay of, 292
PGA_1, PGE_2, diazoxide, effect of, on myocardial contractile force, 260
PGE_2, PGA_1, diazoxide, effect of, on myocardial contractile force, 260
pH, environmental, effect of, on glycosaminoglycans metabolism by normal human chondrocytes, 198
Phagocytosis, macrophage, biological properties of granuloma glycoprotein that inhibits, 98
Phenobarbital and chenodeoxycholic acid, effect of on rate-limiting enzyme of hepatic cholesterol and bile acid synthesis in patients with gallstones, 281
Phosphate transport in intact and acutely thyroparathyroidectomezed rats, effect of mannitol on, 680
Phosphorylation, activation of renal erythropoietic factor by, 83
  mitochondrial oxidative, and energy charge of perfused guinea pig liver, effect of insulin on, 925
Pi M, identification of subtypes, genetic typing of a_1-antitrypsin by immunofixation electrophoresis, 152
Plasma, direct quantitation of cholestanol in, by gas-liquid chromatography, 345
  and erythrocytes, diluted, direct spectrofluorometry of: a rapid diagnostic method in primary and secondary porphyrinemias, 362
  to interstitial fluid volume, changes in ratio of, during long-term antihypertensive therapy, 781
  lipids and lipoproteins in man, effects of chronic uremia, hemodialysis, and renal transplantation on, 37
  platelet-rich, and gel-separated platelets, clot retraction, evaluation in dilute suspensions of, 49
  post-heparin activity and triglyceride clearance in uremic and hemodialysis patients and renal allograft recipients, 648
  proteins in hemostatic plugs in humans, immunofluorescent localization of factor VIII-related antigen, fibrinogen, and several other, 112
Platelet aggregation, inhibition of, by 5-nitro-2-furaldehyde diacetate with observations on structure-activity relationships, 703
  labile aggregation stimulating substance, free fatty acids, and, 73
  antiplasmin: its extrusion during release reaction, subcellular localization, characterization, and relationship to antiheparin in pig platelets, 659
  collagen interaction, direct measurement of, by affinity chromatography on collagen/Sepharose, 525
  factor 4, human, immunoassay of (PF_4, antiheparin factor) by radial immunodiffusion, 720
  function tests and their interpretation, 909
  gel-separated, clot retraction, evaluation in dilute suspensions of platelet-rich plasma and, 49
  rich plasma and gel-separated platelets, clot retraction, evaluation in dilute suspensions of, 49

Platelet—cont'd.
serotonin, an improved method for extraction of endogenous, 129
Pneumococcal polysaccharide, detection of, in sputum of patients with pneumococcal pneumonia by counterimmunoelectrophoresis, 496
Pneumonia, pneumococcal, detection of pneumococcal polysaccharide in sputum of patients with, by counterimmunoelectrophoresis, 496
Polysaccharide, pneumococcal, detection of, in sputum of patients with pneumococcal pneumonia by counterimmunoelectrophoresis, 496
Porphyrinemias, primary and secondary, rapid diagnostic method in, direct spectrofluorometry of diluted erythrocytes and plasma, 362
Potassium, serum, and blood glucose concentrations, changes in, after trimethaphan administration in man, 999
Pre-immunization and granulocyte transfusion therapy, combined, for treatment of pseudomonas septicemia in neutropenic dogs, 840
Proinsulin-insulin hypersecretion, direct relationship of, to basal serum levels of cholesterol and triglyceride in myotonic dystrophy, 384
Proprionate oxidation and serine biosynthesis, impaired, reversible by cyanocobalamin therapy, defective leukocyte metabolism in human cobalamin deficiency, 89
Protein binding defect in uremic sera by charcoal treatment, correction of, 637
C-reactive, molecular size of, synthesized in vitro, 617
iron-binding, new, isolated from intestinal mucosa, 670
Pseudomonas septicemia in neutropenic dogs, combined pre-immunization and granulocyte transfusion therapy for treatment of, 840

R

Rabbit fibrinogen, satisfactory radioiodination of, using chloramine-T, 169
Radioimmunoassay for arginine vasopressin, heterologous, 338
to determine the subtypes D and Y of the hepatitis-B surface antigen, 734
of human C-reactive protein and levels in normal sera, 120
of peptide hormones in gastric and duodenal secretions, artifacts in, 292
Radioiodination, satisfactory, of rabbit fibrinogen using chloramine-T, 169
Rat(s), baby, lead content of tissues of, born of, and nourished by lead-poisoned mothers, 273
hypertensive, exaggerated natriuresis in conscious spontaneously, 265
liver, isolated perfused, comparison of sulfobromophthalein (BSP) and sulfobromophthalein glutathione (BSP-GSH) disposition under conditions of altered liver function and, 373
salt-induced hypertension in, with hereditary hydronephrosis: effect of renomedullary transplantation, 232
single and multiple drug therapy in autologous immune complex nephritis in, 27
site of decreased fluid reabsorption after release of ureteral obstruction in, 397
Rats—cont'd.
thyroparathyroidectomized, effect of mannitol on phosphate transport in intact and acutely, 680
Red cell folate and serum, radioassay for, 138
sickling, determinants of, effects of varying pH and of increasing intracellular hemoglobin concentration by osmotic shrinkage, 597
volume, measurement, of circulating, using nonradioactive cesium and fluorescent excitation analysis, 535
Renal allograft recipients, plasma post-heparin activity and triglyceride clearance in uremic and hemodialysis patients and, 648
catabolism and uremia, roles of, in modifying clearance of fibrinogen and its degradative fragments D and E, 934
erythropoietic factor, activation of, by phosphorylation, 83
function after release of 24-hour ureteral obstruction, influence of renin depletion on, 58
blood pressure, body fluids, electrolytes, and serum lipids of normotensive man, effect of dietary sodium chloride on, 418
hypertension, experimental model of severe, 561
infection, bacterial interference as factor in, 792
phosphate handling in normal man, failure of water immersion to influence parathyroid hormone secretion and, 218
sodium conservation in man, age as a determinant of, 411
transplantation, effects of chronic uremia, hemodialysis, and, on plasma lipids and lipoproteins in man, 37
Renin activity and aldosterone excretion, effect of aging on, 947
angiotensin and aldosterone responses to stimuli in patients with treated congestive heart failure, 1005
depletion of renal function after release of 24-hour ureteral obstruction, influence of, 58
Renomedullary transplantation, salt-induced hypertension in rats with hereditary hydronephrosis, effect of, 232
Respiratory cells and peripheral blood leukocytes of rhesus monkeys, IgE-mediated histamine and SRS-A release from, 1016
Riboflavin and thiamin deficiencies, simultaneous, effect of, on determination of transketolase and glutathione reductase, 741
Ristocetin, platelet-bound, aggregation factor in normal subjects and patients with von Willebrand's disease, 976

S

Salt-induced hypertension in rats with hereditary hydronephrosis: effect of renomedullary transplantation, 232
Septicemia, pseudomonas, in neutropenic dogs, combined pre-immunization and granulocyte transfusion therapy for treatment of, 840
Serine biosynthesis and proprionate oxidation, impaired, reversible by cyanocobalamin therapy, defective leukocyte metabolism in human cobalamin deficiency, 89

Serotonin, platelet, an improved method for extraction of endogenous, 129
Serratia marcescens infection, host resistance to, serum bactericidal activity and phagocytosis by normal blood leukocytes, 206
Serum levels, basal, of cholesterol and triglyceride in myotonic dystrophy, direct relationship of proinsulin-insulin hypersecretion to, 384
lipids, body fluids, blood pressure, electrolytes, renal function of normotensive man, effect of dietary sodium chloride on, 418
normal, radioimmunoassay of human C-reactive protein and levels in, 120
pancreatic isoamylases in cystic fibrosis, quantitative evaluation of, 164
proteins, specific, sequential changes in concentration of, during typhoid fever infection in man, 577
and red cell folate, radioassay for, 138
uremic, correction of protein binding defect in, by charcoal treatment, 637
Sickle cell disease, extracorporeal treatment with cyanate in,: preliminary observations in four patients, 462
Sickling, red cell, determinants of, effects of varying pH and of increasing intracellular hemoglobin concentration by osmotic shrinkage, 597
Sodium chloride, dietary, effect of, on blood pressure, body fluids, electrolytes, renal function, and serum lipids of normotensive man, 418
reabsorption by proximal tubule, effect of plasma bicarbonate level on, in NH_4Cl-loaded dogs, 804
taurocholate (TC), solution properties of sulfobromophthalein (BSP) compounds alone and in association with, 443
and water homeostasis, deranged, determinants of, in decompensated cirrhosis, 822
Spectrofluorometry, direct, of diluted erythrocytes and plasma: a rapid diagnostic method in primary and secondary porphyrinemias, 362
Sputum, detection of pneumococcal polysaccharide in, of patients with pneumococcal pneumonia by counterimmunoelectrophoresis, 496
SRS-A release and IgE-mediated histamine from respiratory cells and peripheral blood leukocytes of rhesus monkeys, 1016
Stem cell compartment repletion, sensitivity to radiation and cycle-active drugs as a function of, 320
Sulfobromophthalein (BSP and sulfobromophthalein glutathione (BSP-GSH), comparison of, disposition under conditions of altered liver function and in the isolated perfused rat liver, 373
sodium (BSP) compounds, solution properties of, alone and in association with sodium taurocholate (TC), 443
Superoxide dismutase in red blood cells: method of assay and enzyme content in normal subjects and in patients with β-thalassemia (major and intermedia), 1057
Syndrome, hypereosinophilic, eosinophil kinetics in, 487
Systolic and diastolic blood pressure measurements in monkeys determined by noninvasive tail-cuff, 354
Sweat, human, autoantigens in: purification and characterization of D-group antigens, 251

T

Tail-cuff, diastolic and systolic blood pressure measurements in monkeys determined by a noninvasive, 354
β-Thalassemia (major and intermedia), method of assay of superoxide dismutase and enzyme content in normal subjects and in patients with, 1057
Thiamin and riboflavin deficiencies, simultaneous, effect of, on determination of transketolase and glutathione reductase, 741
Thrombocytopenia, selective, influence of, on nephrotoxic nephritis, 967
Thrombocytopoiesis in W/W^v mice, 913
Tissues of baby rats, lead content of, born of, and nourished by lead-poisoned mothers, 273
Transketolase and glutathione reductase, determination of, effect of simultaneous thiamin and riboflavin deficiencies, 741
Transplantation, renal, effects of chronic uremia, hemodialysis, and, on plasma lipids and lipoproteins in man, 37
Triglyceride and cholesterol in myotonic dystrophy, direct relationship of proinsulin-insulin hypersecretion to basal serum levels of, 384
clearance in uremic and hemodialysis patients and renal allograft recipient plasma post-heparin activity and, 648
Trimethaphan administration in man, changes in serum potassium and blood glucose concentrations after, 999
Tuberculin sensitivity in acute uremia, mechanism of inhibition of adoptive transfer of, 457
Typhoid fever infection in man, sequential changes in concentration of specific serum proteins during, 577

U

Ultrafiltration, detrimental effects of, on diffusion in coils, 435
Uremia, acute, mechanism of inhibition of adoptive transfer of tuberculin sensitivity in, 457
chronic, hemodialysis, and renal transplantation of plasma lipids and lipoproteins in man, effects of, 37
effect of, on penicillin flux between blood and cerebrospinal fluid, 749
and renal catabolism, roles of, in modifying clearance of fibrinogen and its degradative fragments D and E, 934
Ureteral obstruction, 24-hour, influence of renin depletion on renal function after release of, 58
in rat, site of decreased fluid reabsorption after release of, 397
Urinary excretion of carnitine in man, 760

V

Vasopressin, arginine, heterologous radioimmunoassay for, 338
Vitamin B_6 status of young men, women, and women using oral contraceptives, 813
D endocrine system, recent advances in our understanding of, 7

von Willebrand's disease, platelet-bound ristocetin aggregation factor in normal subjects and patients with, 976
protein, electrophoretic heterogeneity of normal factor VIII, and abnormal electrophoretic mobility in patients with von Willebrand's disease, 185

W

Water immersion, failure of, to influence parathyroid hormone secretion and renal phosphate handling in normal man, 218
Water—cont'd.
and sodium homeostasis, deranged, determinants of, in decompensated cirrhosis, 822

X

Xanthoma cholesterol, turnover of, in hyperlipoproteinemia patients, 503

Subject index*

A

Abnormalities of cholesterol turnover in hypercholesterolemic patients, 202
ACTH in episodic release of aldosterone in idiopathic adrenal hyperplasia, hypertension, and hyperaldosteronism, 261
Adenosine triphosphate, gamma ^{32}P-labeled, method for preparation of, 520
Adrenal scintiscan, dexamethasone-modified, in hyporeninemic aldosteronism, compared with adrenal venography and adrenal venous aldosterone, 841
  venography compared with dexamethasone-modified adrenal scintiscan in hyporeninemic aldosteronism, 841
  venous aldosterone compared with dexamethasone-modified adrenal scintiscan in hyporeninemic aldosteronism, 841
Age, effect of, on plasma proinsulin-like material after oral glucose, 359
Airway damage, inflammatory reaction and, in cystic fibrosis, 423
Aldosteronism, hyporeninemic, dexamethasone-modified scintiscan in, 841
Alipoprotein A-I, canine, catabolism of, 63
Alkaline phosphatase, neutrophils deficient in, abnormal bactericidal activity of, 788
Allergic manifestations with severe staphylococcal disease, 796
Alpha-L-fucosidase, plasma, low activity variant of, in some normal individuals, 469
Alterations, lifelong, in endocrine function, from brief perinatal hypothyroidism in rat, 3
Alveolar lining material, effect of, on phagocytic and bactericidal activity of lung macrophages against *Staphylococcus aureus*, 691
Anemia of thermal injury, erythropoietin response to, 584
Angiotensin I, radioimmunoassay of, interference by 2,3-dimercapto-1-propanol in, 222
Antecedent hormone administration, effect on lipolysis in perifused isolated rat cell, 984
Antibiotic synergism in enterococcal endocarditis, 132
Antibody response, marihuana-induced, 194
α_1-Antitrypsin phenotypes, determination of, in isoelectric focusing in polyacrylamide gels, 151
  urinary, serum levels of conponent reacting with antiserum to, 904
Aortic tissue, phytosterols in, 914
Artificial kidneys, hollow fiber, solute clearance in, effects of ultrafiltration on, 593
Asthma, immunologic, compared to two types of cholinergic respiratory responses in rhesus monkey, 995
Autoimmune hyperlipidemia, dynamics of cholesterol in, 769
Automatic device for taking and recording blood pressure, evaluation of, 826

B

Bactericidal activity, abnormal, in neutrophils deficient in granules, myeloperoxidase, and alkaline phosphatase, 788
  of lung macrophages against *Staphylococcus aureus*, effect of alveolar lining material on, 691
  capability in human neutrophils, maximal, quantitation of, 316
Bicarbonate response of dog pancreas to vasoactive intestinal peptide and secretin, 608
Bile acid metabolism in squirrel monkeys with and without cholesterol gallsones, diet effect on, 649
  conjugated and unconjugated bilirubin in, thin-layer chromatographic method for measuring, 857
Bilirubin, conjugated and unconjugated, in bile, thin-layer chromatographic method for measurement of, 857
Bleeding time, prolonged, in von Willebrand's disease, 662
Blood pressure control, indomethacin and, 578
  effects of varying sodium intake on, in subtotally nephrectomized rats, 807
  evaluation of new automatic device for taking and recording, 826
  smears, 2,5-fluorenediamine and 2,7-fluorenediamine as peroxidase reagents for, 334
  spotted on filter paper, estimation of galactose-l-phosphate in, 515
  whole, microculture assay of human lymphocyte function, 864

C

Calcitonin in plasma, normal thyroid, and medullary thyroid carcinoma of rat, radioimmunoassay of, 173
Calcium, total body, effect of hydrocortisone on, in rats, 834
Canine alipoprotein A-I, catabolism of, 63
Catabolism of canine alipoprotein A-I, 63
Cattle, pulmonary vascular resistance in, lowered by minoxidil, 835
Cell-mediated immunity to collagen in progressive systemic sclerosis, 601
Cellular labeling with radiochromium salts, reappraisal of, 1032
Chemical diabetic subjects, interrelationships of lipid, glucose, and insulin in, 345

*July, pp. 1-172; August, pp. 173-344; September, pp. 345-524; October, pp. 525-688; November, pp. 689-872; December, pp. 873-1054.

Chemotactic responsiveness, neutrophil, effect of hemodialysis on, 971
Chemotaxis, leukocyte, computer-based method for quantification of, 487
Chloroquine poisoning, hemodialysis and, 87
Cholesterol dynamics in autoimmune hyperlipidemia, 769
esterified, transport in plasma high density lipoproteins, mathematical model, 627
gallstones, squirrel monkeys with and without, diet effect on hepatic bile formation and bile acid metabolism in, 649
turnover, abnormalities in hypercholesterolemic patients, 202
Cholinergic respiratory response compared to immunologic asthma in rhesus monkey, 995
Chromatography, thin-layer, for measuring conjugated and unconjugated bilirubin in bile, 857
Chromosomal breakage and scleroderma, family studies, 81
Chromosome-banding techniques in establishing origin of porcine cell line, 965
Chronic renal failure, depressed neutrophil chemotaxis in, 536
Cirrhosis, primary, hypercatabolism of third component of complement in, 427
Colestipol, effects of, on metabolism of very-low-density lipoproteins in man, 1008
Collagen, cell-mediated immunity to, in progressive systemic sclerosis, 601
Complement, activation of alternative pathway of, in childhood acute lymphoblastic leukemia, 745
third component of, hypercatabolism of, in primary biliary cirrhosis, 427
Computer-based method for quantification of leukocyte chemotaxis, 487
Conservation of another natural resource, 1
Counterimmunoelectrophoresis in rapid, specific identification of group D streptococci, 339
Cuprophane, platelet adhesion to, with whole blood flow, 368
Cyclic AMP and bicarbonate responses of dog pancreas to vasoactive intestinal peptide and secretin, 608
3′,5′-guanosine monophosphate, effect on human platelet function, 215
nucleotides in regulation of erythrocyte shape and permeability, 555
Cystic disease of rat, experimental, renal function in, 402
fibrosis, composition of nasal secretion in, 114
inflammatory reaction and airway damage in, 423

D

Defective initiation of metabolic stimulation in phagocytizing granulocytes, 757
Degradation of gastrin by gastric mucosal cells, 292
Depressed neutrophil chemotaxis in chronic renal failure and after renal transplantation, 536
Dexamethasone-modified adrenal scintiscan in hyporeninemic aldosteronism, compared with adrenal venography and adrenal venous aldosterone, 841
Diazotized (^{125}I)-diiodosulfanilic acid, human platelets labeled by, to study surface proteins, 232
rabbit platelets labeled by, to study surface proteins, 247
Diet effect on hepatic bile formation and bile acid metabolism in squirrel monkeys with and without cholesterol gallstones, 649
2,3-Dimercapto-1-propanol, interference by, in angiotensin I radioimmunoassay, 222
Diphenylhydantoin-induced suppression, selective, of lymphocyte reactivity in vitro, 417
Dog pancreas, cyclic AMP and bicarbonate responses of, to vasoactive intestinal peptide and secretin, 608
platelet adhesion to Cuprophane with whole blood flow, vs. human platelet, 368
pulmonary vascular resistance in, lowered by minoxidil, 885

E

Electronic measurement of platelet size and shape, improved technique for, 301
Endocarditis, bacterial, reversible neutrophil defect in, 780
enterococcal, antibiotic synergism in, 132
staphylococcal, experimental, synergism of nafcillin-gentamicin in, 118
Endocrine function in rat, lifelong alterations in, from brief perinatal hypothyroidism, 3
Endotoxin and prevention of hypoxic pulmonary vasoconstriction, 975
Enterococcal endocarditis, antibiotic synergism in, 132
Epinephrine infusion for measuring marginal neutrophil pool size, normal and in neutropenia, 614
Episodic release of aldosterone in idiopathic adrenal hyperplasia, hypertension, and hyperaldosteronism, ACTH in, 261
Erythrocyte permeability, possible role for cyclic nucleotides in regulation of, 555
shape, possible role for cyclic nucleotides in regulation of, 555
sickle, oxygen-dependent circulation of, 732
Erythropoiesis in chronic renal disease, 528
splenic, increased, in mice treated with estradiol benzoate, 700
Erythropoietin, extrarenal, effect of renin on production of, 707
preparation of, effects on thrombopoiesis, 930
response to anemia of thermal injury, 584
Esterified cholesterol, transport in plasma high density lipoproteins, mathematical model, 627
Estimation of concentration of major lipid components of human serum lipoproteins, mathematic methods for evaluating, 491
Estradiol benzoate, increased splenic erythropoiesis in mice treated with, 700

F

Factor VIII, evidence that is separate from platelet retention factor, 14
-related antigen, evidence that is separate from platelet retention factor, 14
XII, human, radioimmunoassay of, 506
XIII concentration in sickle-cell disease, 546
Fat cell, perifused and isolated, lipolysis in, effect of antecedent hormone administration on, 984
Felty's syndrome, polymorphonuclear leukocyte inclusions and impaired bacterial killing in, 183
Fibrinogen Paris I, plasmic degradation of, 817
2,7-Fluorenediamine and 2,5-fluorenediamine as peroxidase reagents for blood smears, 334

G

Galactose-l-phosphate, estimation of, in blood spotted on filter paper, 515
Gamma ^{32}P-labeled guanosine triphosphate and adenosine triphosphate, method for preparation of, 520
Gastric mucosal cells, degradation of gastrin by, 292
Gastrin, degradation of, by gastric mucosal cells, 292
Gentamicin; *see* Nafcillin-gentamicin synergism

Glucose, lipid and insulin interrelationships with, in normal, prediabetic, and chemical subjects, 345
oral, plasma proinsulin-like material after, effect of age on, 359
Glycerol-induced acute renal failure, mechanism of, 44
Granulocytes, phagocytizing, defective initiation of metabolic stimulation in, 757
regulation of functions of, by zinc of prostatic fluid and prostate tissue, 640
Guanosine triphosphate, gamma ^{21}P-labeled, method for preparation of, 520

H

Hageman factor; *see* Factor XII
Halofenate inhibition of normal and hypersensitive platelets, 282
HB_sAg; *see* Hepatitis B surface antigen
Heart, uremic rat, subcellular control factors in, 563
Hemochromatosis, idiopathic, iron storage in, 725
Hemodialysis and chloroquine poisoning, 87
effect on neutrophil chemotactic responsiveness, 971
Hemoglobins, abnormal, immunologic identification of, 621
Hope, oxygen equilibrium in heterozygotes, hemoglobin S-Hope disease, and isolated hemoglobin Hope, 125
S-Hope disease, oxygen equilibrium in, 125
Hemorrhage, effects on thrombopoiesis, 930
Hemostatic alterations accompanying sickle cell pain crises, 440
Heparin, removal from plasma, 922
Hepatic bile formation, diet effect on, in squirrel monkeys with and without cholesterol gallstones, 649
Hepatitis B surface antigen, prevalence of, in commercial plasma products, 102
removal of, from plasma fractions, 91
Hodgkin's disease, bactericidal function of polymorphonuclear leukocyte, monocyte, and macrophage in, 54
Hollow fiber artificial kidneys, effects of ultrafiltration on solute clearances in, 593
Hormone administration, antecedent, effect on lipolysis in perifused isolated fat cell, 984
Human metabolism of very-low-density lipoproteins, effects of colestipol on, 1008
platelet function, effect of cyclic 3′,5′-guanosine monophosphate on, 215
Hydrocortisone, effect of, on total body calcium in rats, 834
16β-Hydroxydehydroepiandrosterone, mineralocorticoid activity of, 571
Hyperaldosteronism, episodic release of aldosterone in, role of ACTH, 261
Hypercatabolism of third component of complement in primary biliary cirrhosis, 427
Hypercholesterolemic patients, abnormalities of cholesterol turnover in, 202
Hypercupremia with monoclonal immunoglobulin, 375
Hyperimmunoglobulinemia E with severe staphylococcal disease, 796
Hyperlipidemia, autoimmune, dynamics of cholesterol in, 769
Hypersensitive platelets, inhibition by halofenate, 282
Hypertension, episodic release of aldosterone in, role of ACTH, 261
Hypertriglyceridemia, primary, human plasma lecithin:cholesterol acyltransferase increased activity in, 29
Hypocalcemia, lack of effect of, on renal phosphate handling, 271
Hypothyroidism in rat, perinatal, causing lifelong alterations in endocrine function, 3
Hypoxia, effects on thrombopoiesis, 930
pulmonary vascular pressor response to, platelets not essential for, 412

I

^{131}I-asialo-α_1-acid glycoprotein, use in liver function tests of metabolism in rat, 142
(^{125}I)-diiodosulfanilic acid, diazotized, labeling of human platelets to study surface proteins, 232
labeling of rabbit platelets to study surface proteins, 247
Idiopathic adrenal hyperplasia, episodic release of aldosterone in, role of ACTH, 261
Immunoglobulin, monoclonal, hypercupremia with, 375
Immunologic asthma compared to two types of cholinergic respiratory response in rhesus monkey, 995
identification of abnormal hemoglobins, 621
Impaired bacterial killing in Felty's syndrome, polymorphonuclear leukocyte inclusions and, 133
Indomethacin and blood pressure control, 578
and sodium meclofenamate, effect on renal concentrating defect in experimental enterococcal pyelonephritis in rats, 958
Inflammatory reaction and airway damage in cystic fibrosis, 423
Insulin, glucose and lipid interrelationships with, in normal, prediabetic, and chemical diabetic subjects, 345
Iron-binding capacity, unsaturated, standardization of, 477
overload, dietary, iron storage in, 725
storage in dietary iron overload and idiopathic hemochromatosis, 725
Isoelectric focusing in polyacrylamide gels, determination of α_1-antitrypsin phenotypes by, 151

K

Kidneys, artificial, hollow fiber, effects of ultrafiltration on solute clearances in, 593
preservation, low-termperature, metabolic consequences of, 873
Kwashiorkor, neutrophil function in children with, 450

L

Lactoferrin, solid-phase radioimmunoassay for measurement of, in human plasma, 156
Leaders in medical excellence, 689
Leukemia, lymphoblastic, childhood acute, activation of alternative pathway of complement in, 745
Leukocyte chemotaxis, computer-based method for quantification of, 487
removal from whole blood, 328
Lipid components of human serum lipoproteins, mathematic evaluation of methods for estimating, 491
glucose, and insulin interrelationships in normal, prediabetic, and chemical diabetic subjects, 345
Lipolysis in perifused isolated fat cell, effect of antecedent hormone administration on, 984
Lipoproteins, high-density plasma, transport of esterified cholesterol in, mathematical model, 627
very-low-density, effects of colestipol on human metabolism of, 1008
Liver function test of metabolism in rat, ^{131}I-asialo-α_1-acid glyprotein in, 142
Lymphoblastic leukemia, acute, childhood, activation of alternative pathway of complement in, 745

Lymphocyte function, human, whole blood microculture assay of, 864
reactivity, selective diphenylhydantoin-induced suppression in vitro, 417

M

Macromolecules, fractional uptake of, by renal vascular and other vascular beds, 716
Macrophage, bactericidal function of, in Hodgkin's disease, 54
Malondialdehyde formation as indicator of prostaglandin production by human platelets, 167
Marginal neutrophil pool size, normal and in neutropenia, measured by epinephrine infusion, 614
Marihuana-induced antibody response, 194
Mechanism of glycerol-induced acute renal failure, 44
Medical accountability and medical education, 525
Medical education, medical accountability and, 525
Metabolic consequences of low-temperature kidney preservation, 873
stimulation in phagocytizing granulocytes, defective initiation of, 757
Metabolism, human, of very-low-density lipoproteins, effects of colestipol on, 1008
Mice treated with estradiol benzoate, increased splenic erythropoiesis in, 700
Microculture assay, whole blood, of human lymphocyte function, 864
Mineralocorticoid activity of 16β-hydroxydehydroepiandrosterone and related steroids, 571
Minoxidil and lower pulmonary vascular resistance in dogs and cattle, 885
Monkey, rhesus, immunologic asthma in, compared to two types of cholinergic respiratory response in, 995
squirrel, hepatic bile formation and bile acid metabolism in, effect of diet on, 649
Monocyte, bactericidal function of, in Hodgkin's disease, 54
Mucociliary clearance, rheological factor in, 22
Mucosal cells, gastric, degradation of gastrin by, 292
Myeloperoxidase, neutrophils deficient in, abnormal bactericidal activity of, 788

N

Nafcillin-gentamicin synergism in experimental staphylococcal endocarditis, 118
Nasal secretion, composition of, in cystic fibrosis, 114
Natriuretic effect of para-aminohippurate, 895
Natural resource, conservation of another, 1
Neutropenia, marginal neutrophil pool size in, measured by epinephrine infusion, 614
Neutrophil chemotactic responsiveness, effect of hemodialysis on, 971
chemotaxis, defective, with severe staphylococcal disease, 796
depressed, in chronic renal failure and after renal transplantation, 536
defect, reversible, in bacterial endocarditis, 780
deficient in granules, myeloperoxidase, and alkaline phosphatase, abnormal bactericidal activity in, 788
function in children with kwashiorkor, 450
human, bactericidal capability of, quantification, 316
Normal individuals, presence of low activity of plasma alpha-L-fucosidase in, 469
platelets, inhibition by halofenate, 282
Nucleotides, cyclic, in regulation of erythrocyte shape and permeability, 555

O

Oxygen-dependent circulation of sickle erythrocytes, 732
equilibrium in heterozygotes, hemoglobin S-Hope, and isolated hemoglobin Hope, 125

P

Pain crises in sickle-cell disease, hemostatic alterations accompanying, 440
Pancreas, dog, cyclic AMP and bicarbonate responses to vasoactive intestinal peptide and secretin, 608
Para-aminohippurate, natriuretic effect of, 895
Parotid saliva, biochemical studies on, in sarcoidosis with salivary gland involvement, 276
Peroxidase reagents for blood smears, 2,7-fluorenediamine and 2,5-fluorenediamine as, 334
Phagocytic activity of long macrophages against *Staphylococcus aureus*, effect of alveolar lining material on, 691
Phosphate, renal handling of, lack of effect of hypocalcemia on, 271
Phospholipid metabolism, red cell, in vitro effect of primaquine on, 462
Phytosterols in aortic tissue, 914
Plasma alpha-L-fucosidase, low activity variant of, in some normal individuals, 469
calcitonin in, radioimmunoassay of, 173
disappearance of sulfobromophthalein, 1019
fractions, removal of hepatitis B surface antigen from, 91
high density lipoproteins, transport of esterified cholesterol in, mathematical model, 627
human, lactoferrin in, solid-phase radioimmunoassay for measuring, 156
lecithin:cholesterol acyltransferase, human, increased activity of, in primary hypertriglyceridemia, 29
products, commercial, prevalence of hepatitis B surface antigen in, 102
Plasmic degradation of fibrinogen Paris I, 817
Platelet adhesion to Cuprophane with whole blood flow, human vs. dog, 368
function, human, effect of cyclic 3′,5′-guanosine monophosphate on, 215
human, production of prostaglandin by, malondialdehyde as indicator of, 167
normal and hypersensitive, inhibition of, by halofenate, 282
not essential for pulmonary vascular pressor response to hypoxia, 412
plasma membranes, human, surface proteins of, labeled by diazotized (^{125}I)-diiodosulfanilic acid, 232
rabbit, surface proteins of, labeled with diazotized (^{125}I)-diiodosulfanilic acid, 247
removal of, from whole blood, 328
retention factor, evidence that is separate from factor VIII-related antigen and factor VIII, 14
size and shape, electronic measurement of, improved technique for, 301
Polyacrylamide gels, isoelectric focusing in, to determine α_1-antitrypsin phenotypes, 151
Polymorphonuclear leukocyte inclusions and impaired bacterial killing in Felty's syndrome, 183
monocyte, and macrophage, bactericidal function of, in Hodgkin's disease, 54
Porcine cell line, establishing origin of, by chromosome-banding techniques and scanning, 965

Prediabetic subjects, interrelationships of lipid, glucose, and insulin in, 345
Pressor response, pulmonary vascular, to hypoxia, platelets not essential for, 412
Primaquine, in vitro effect on red cell phospholipid metabolism, 462
Progressive systemic sclerosis, cell-mediated immunity to collagen in, 601
Proinsulin-like, plasma, after oral glucose, effect of age on, 359
Prostaglandin, production of, by human platelets, malondialdehyde as indicator of, 167
Prostate tissue and prostatic fluid, zinc of, as regulator of granulocyte functions, 640
Prostatic fluid and prostate tissue, zinc of, as regulator of granulocyte functions, 640
Protamine, removal from plasma, 922
Pulmonary vascular pressor response to hypoxia, platelets not essential for, 412
resistance in dogs and cattle, lowered by minoxidil, 885
vasoconstriction, hypoxic, prevention of, and endotoxin, 975

R

Radiochromium salts, reappraisal of cellular labeling with, 1032
Radioimmunoassay of angiotensin I, interference in, by 2,3-dimercapto-l-propanol, 222
of calcitonin in plasma, normal thyroid, and medullary thyroid carcinoma in rat, 173
of human factor XII, 506
solid-phase, for measuring lactoferrin in human plasma, 156
Rats, effect of hydrocortisone on total body calcium in, 834
of indomethacin and sodium meclofenamate on renal concentrating defect in experimental enterococcal pyelonephritis in, 958
experimental cystic disease in, renal function in, 402
enterococcal pyelonephritis in, effect of indomethacin and meclofenamate on renal concentrating defect in, 958
metabolism, liver function tests with ^{131}-I-asialo-α_1-glycoprotein, 142
subtotally nephrectomized, effects of varying sodium intake on blood pressure and renin-angiotensin system in, 807
uremic, subcellular factors in hearts of, 563
Red cell phospholipid metabolism, in vitro effect of primaquine on, 462
Regulation of granulocyte functions by zinc of prostatic fluid and prostate tissue, 640
of plasma lecithin:cholesterol acyltransferase in man, increased activity in primary hypertriglyceridemia, 29
Removal of heparin and protamine from plasma, 922
of leukocytes and platelets from whole blood, 328
Renal acidification in sickle-cell disease, 389
concentrating defect, effect of indomethacin and sodium meclofenamate on, in experimental enterococcal pyelonephritis in rats, 958
disease, chronic, erythropoiesis in, 528
failure, acute, glycerol-induced, mechanism of, 44
high levels of component reacting with antiserum to urinary antitrypsin in, 904
function in experimental cystic disease of rat, 402
phosphate handling, lack of effect of hypocalcemia on, 271
transplantation, depressed neutrophil chemotaxis after, 536
vascular bed, fractional uptake of macromolecules by, 716
Renin-angiotensin system, effects of varying sodium intake on, in subtotally nephrectomized rats, 807
effect of, on extrarenal erythropoietin production, 707
Rheological factor in mucociliary clearance, 22

S

Salivary gland involvement in sarcoidosis, biochemical studies on parotid saliva, 276
Sarcoidosis with salivary gland involvement, biochemical studies on parotid saliva, 276
Scanning in establishment of origin of porcine cell line, 965
Scleroderma, chromosomal breakage and, family studies, 81
Sclerosis, progressive systemic, cell-mediated immunity to collagen in, 601
Secretin, cyclic AMP and bicarbonate responses of dog pancreas to, 608
Serum levels of component reacting with antiserum to urinary antitrypsin, 904
lipoproteins, human, major lipid components of, mathematical method for evaluating estimation of, 491
unsaturated iron-binding capacity, standardization of, 477
Sickle-cell disease, factor XIII concentration in, 546
pain crises in, hemostatic alterations accompanying, 440
renal acidification in, 389
erythrocytes, oxygen-dependent circulation of, 732
Sodium intake, varying, effects on blood pressure and renin-angiotensin system in subtotally nephrectomized rats, 807
meclofenamate, effect on renal concentrating defect in experimental enterococcal pyelonephritis in rats, 958
Solute clearance in hollow fiber artificial kidneys, effects of ultrafiltration on, 593
Splenic erythropoiesis, increased, in mice treated with estradiol benzoate, 700
Standardization of serum unsaturated iron-binding capacity, 477
Staphylococcal disease, severe, with allergic manifestations, hyperimmunoglobulinemia E, and defective neutrophil chemotaxis, 796
endocarditis, experimental, synergism of nafcillin-gentamicin in, 118
Staphylococcus aureus, phagocytic and bactericidal activity of lung macrophages against, effect of alveolar lining material on, 691
Steroids, mineralocorticoid activity of, 571
Streptococci, group D, rapid specific identification by counterimmunoelectrophoresis, 339
Subcellular control factors in hearts of uremic rats, 563
Sulfobromophthalein, plasma disappearance of, 1019
Suppression of lymphocyte reactivity in vitro, selective, diphenylhydantoin-induced, 417
Surface proteins of human platelets labeled with diazotized (^{125}I)-diiodosulfanilic acid, 232
of rabbit platelets labeled with diazotized (^{125}I)-diiodosulfanilic acid, 247

T

Tests, liver function, of metabolism in rat, ^{131}I-asialo-α_1-acid glycoprotein in, 142

Thermal injury, anemia of, erythropoietin response to, 584
Thin-layer chromatographic method for measuring conjugated and unconjugated bilirubin in bile, 857
Thrombopoiesis, effects of hemorrhage, hypoxia, and preparation of erythropoietin on, 930
Thyroid, medullary carcinoma of, radioimmunoassay of calcitonin in, 173
normal, calcitonin in, radioimmunoassay of, 173
Transport of esterified cholesterol in plasma high density lipoproteins, mathematical model, 627

U

Ultrafiltration effects on solute clearances in hollow fiber artificial kidney, 593
Uptake, fractional, of macromolecules by renal vascular and other vascular beds, 716
Urinary antitrypsin, serum levels of component reacting with antiserum to, 904

V

Vasoactive intestinal peptide, cyclic AMP and bicarbonate responses of dog pancreas to, 608
von Willebrand's disease, prolonged bleeding time in, 662

W

Whole blood microculture assay of human lymphocyte function, 864

Z

Zinc of prostatic fluid and prostate tissue as regulator of functions of granulocytes, 640
